Independent auditor's report

(English Translation of a Report Originally Issued in Korean)

To the Shareholders and Board of Directors of

Hankook Tire & Technology Co., Ltd.

Opinion

We have audited the accompanying consolidated financial statements of Hankook Tire & Technology Co., Ltd. and Subsidiaries (collectively referred to as the "Group"), which comprise the consolidated statements of financial position as of December 31, 2022, and the consolidated statements of comprehensive income, consolidated statements of changes in equity and consolidated statements of cash flows for the year then ended, and the notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as of December 31, 2022, and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the Republic of Korea ("KIFRS").

Basis for opinion

We conducted our audit in accordance with Korean Standards on Auditing ("KSA"). Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the consolidated financial statements section of our report. We are independent of the Group in accordance with the ethical requirements that are relevant to our audit of the consolidated financial statements in the Republic of Korea, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of Matter

Without qualifying our opinion, we draw attention to the following matters.

A. Significant event after the reporting period

As discussed in Note 44, on March 12, 2023, a fire broke out in the curing process of the Group's Daejeon plant, causing damage to some buildings, machinery, and inventory assets in the plant. Manufacturing at the plant has been completely suspended for safety reasons since March 13, 2023, and the Group is confirming the amount of damaged caused by the fire and considering about dealing with the damage through a property comprehensive insurance.

B. Emphasis of matter in regard to the adjustment of prior period errors

As discussed in Note 45, in the Consolidated statements of financial position as of December 31, 2021, in which the adjustments are not applied, the Group did not recognize impairment loss on Property, plant and equipment, and as a result, the net income was overstated by KRW 12,633 million. The comparative financial statements as of December 31, 2021 was restated by reflecting this error.

In obtaining the audit evidence relevant to the opening balances, we found the adjustment discussed in Note 45 and we conducted the following procedures to conclude that there were the adjustment of prior period errors that required adjustment of the prior financial statements.

- We reviewed whether the facts related to the restatement of the Group's prior financial statements are appropriate.
- If it is existed that detailed relevant evidences supporting the accounting treatment of the Group, we conducted additional audit procedures for the evidences.

We communicated with the Group and predecessor auditor regarding the adjustment. The predecessor auditor concluded that the impairment loss on Property, plant and equipment was immaterial error and decided not to reissue their auditor's report.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Estimation of net realizable value for the finished goods

As described in the Note 2, the Group measures inventories at the lower of cost and net realizable value and recognized inventory valuation allowance of KRW 12,306 million. (See Note 10) Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale. Accordingly, net realizable value of finished goods is calculated by various assumptions, such as estimating the expected selling price and the additional cost of selling the product. Considering that these estimates require significant level of management's judgements and the impact of the finished goods' valuation loss on profit or loss for the year ended December 31, 2022 and subsequent years, may be significant, we determined the estimation of net realizable value for the finished goods as a key audit matter.

We have performed the following audit procedures in relation to the above key audit matter.

- We obtained an understanding of the accounting policy and internal control relevant to the valuation of finished goods inventories.
- We assessed design and effectiveness of major internal controls on net realizable value and valuation process of obsolescence of finished goods.
- We confirmed the basic information data used to estimate net realizable value of finished goods such as aging data for finished goods through sampling.
- We conducted sampling from finished goods sold after the year ended December 31, 2022 and compared the Group's actual selling price of the samples with the estimated selling price used in calculation of net realizable value of finished goods.
- We recalculated valuation allowance of finished goods prepared by the Group.

Other Matter

The Consolidated financial statements of the Group as of December 31, 2021, were audited by Samil PWC, whose report dated March 22, 2022 expressed an unqualified opinion thereon. The predecessor auditor expressed an unqualified opinion thereon on the financial statements, which were not applied the adjustments described in Note 45, and the comparative financial statements as of December 31, 2021 are the financial statements in which the adjustments are applied.

Responsibilities of management and those charged with governance for the Consolidated Financial statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with KIFRS, and for such internal control as management determines is necessary to enable the preparation of the consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditor's responsibilities for the audit of the Consolidated Financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with KSA will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with KSA we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit
 procedures that are appropriate in the circumstances, but not for the purpose of expressing an
 opinion on the effectiveness of the entity's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial

statements. We are responsible for the direction, supervision, and performance of the Group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Gil Jae Lee.

Seoul, Korea

March 24, 2023

This report is effective as of March 24, 2023, the audit report date. Certain subsequent events or circumstances, which may occur between the audit report date and the time of reading this report, could have a material impact on the accompanying consolidated financial statements and notes thereto. Accordingly, the readers of the audit report should understand that there is a possibility that the above audit report may have to be revised to reflect the impact of such subsequent events or circumstances, if any.

¹ The ownership ratio has changed due to the unequal capital increase of Model Solution Co., Ltd. for the year ended December 31, 2022.

1.3 Changes in Scope for Consolidation.

Subsidiaries newly included in the consolidation for the year ended December 31, 2022, are as follow, and there are no subsidiaries excluded from consolidation:

Subsidiary	Reason		
Hankook Tire &Technology Egypt LLC	Newly established		

2. Significant Accounting Policies

2.1 Basis of preparation

The Group maintains its accounting records in Korean won and prepares statutory financial statements in the Korean language (Hangul) in accordance with International Financial Reporting Standards as adopted by the Republic of Korea (Korean IFRS). The accompanying consolidated financial statements have been condensed, restructured and translated into English from the Korean language financial statements.

Certain information attached to the Korean language financial statements, but not required for a fair presentation of the Group's financial position, financial performance or cash flows, is not presented in the accompanying consolidated financial statements.

The consolidated financial statements of the Group have been prepared in accordance with Korean IFRS. These are the standards, subsequent amendments and related interpretations issued by the International Accounting Standards Board (IASB) that have been adopted by the Republic of Korea.

The financial statements have been prepared on a historical cost basis, except for the following:

- Certain financial assets and liabilities (including derivative instruments)
- assets held for sale measured at fair value less costs to sell, and
- defined benefit pension plans plan assets measured at fair value.

The preparation of financial statements requires the use of critical accounting estimates. Management also needs to exercise judgement in applying the Group's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 3.

2.2 Changes in Accounting Policies and Disclosures

2.2.1 New and amended standards adopted by the Group

The Group has applied the following standards and amendments for the first time for their annual reporting period commencing January 1, 2022. The Group have not adopted the amended accounting standards issued that are not mandatory.

(a) Amendments to Korean IFRS 1037 Provisions, Contingent Liabilities and Contingent Assets Onerous Contracts - Cost of Fulfilling a Contract

An onerous contract is a contract in which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under it. The amendments clarify that when assessing whether a contract is onerous, the cost of fulfilling the contract includes both the incremental costs of fulfilling that contract (for example, direct labor and materials) and an allocation of other costs that relate directly to fulfilling contracts (for example, an allocation of the depreciation charge for an item of property, plant and equipment used in fulfilling that contract among others, the costs of management and supervision of contracts). General administrative costs are not directly related to the contract and are excluded unless the contract clearly allows the counterparty to be claimed.

As the Group has no provisions, contingent liabilities, and contingent assets within the scope of the amendments for the year ended December 31,2022, the amendments have no effect on its financial statements.

(b) Amendments to Korean IFRS 1103 Business Combination - Reference to the Conceptual Framework

The amendments are intended to prevent significant changes in requirements when the previous reference to conceptual framework of the International Accounting Standards Board(IASB) is changed to that of the 'Conceptual Framework for Financial Reporting' published in March 2018. An exception was added to the recognition principle in to Korean IFRS 1103 to prevent Day 2 gains or losses from liabilities and contingent liabilities within the scope of Korean IFRS 1037 Provisions, Contingent Liabilities, Contingent Assets or Korean IFRS 2121 Levies. The exception requires the application of Korean IFRS 1037 Provisions, Contingent Liabilities, Contingent Assets or Korean IFRS 2121 Levies instead of conceptual framework to determine whether the present obligation exists at the acquisition date.

In addition, new paragraph is added to Korean IFRS 1103 Business Combination to clarify that contingent assets should not be recognized at the acquisition date. The Group applies the amendments prospectively. In other words, the amendments shall be applied prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period in which the amendments are initially applied. As the Group has no provisions, contingent liabilities, and contingent assets within the scope of the amendments for the year ended December 31,2022, the amendments have no effect on its financial statements.

(c) Amendments to Korean IFRS 1016 Property, Plant and Equipment- Proceeds before intended use

The amendments prohibit an entity from deducting from the cost of an item of property, plant and equipment any proceeds from selling items produced while the entity is preparing the asset for its intended use. Instead, the entity will recognize the proceeds from selling such items, and the costs of producing those items, in profit or loss.

The Group shall apply those amendments retrospectively, but only to items of property, plant and equipment that are capable of operating on or after the beginning of the earliest period presented in the consolidated financial statements in which the Group first applies the amendments.

The amendments has no effect on the consolidated financial statements as the Group has not sold items produced from property, plant and equipment available on or after the beginning of the earliest period presented in the consolidated financial statements in which the Group first applies the amendments.

(d) Korean IFRS1101 'First-time Adoption of International Financial Reporting Standards'- Subsidiary as a first-time adopter

The amendment permits a subsidiary that elects to apply paragraph D16(1) of KIFRS1101 to measure cumulative translation differences using the amounts reported in the parent's consolidated financial statements, based on the parent's date of transition to KIFRS, if no adjustments were made for consolidation procedures and for the effects of the business combination in which the parent acquired the subsidiary. This amendment is also applied to an associate or joint venture that elects to apply paragraph D16(1) of KIFRS 1101. These amendments had no impact on the consolidated financial statements of the Group as it is not a first-time adopter.

(e) Korean IFRS 1109 'Financial Instruments' - Fees in the '10 percent' test for derecognition of financial liabilities

The amendment clarifies the fees that an entity includes when assessing whether the terms of a new or modified financial liability are substantially different from the terms of the original financial liability. These fees include only those paid or received between the borrower and the lender, including fees paid or received by either the borrower or lender on the other's behalf. There is no similar amendment proposed for KIFRS 1039 Financial Instruments: Recognition and Measurement.

In accordance with the transitional provisions, the Group applies the amendments to financial liabilities that are changed or exchanged on or after the start of the annual reporting period in which the amendments are first applied (date of initial application). These amendments had no impact on the consolidated financial statements of the Group as there were no modifications of the Group's financial instruments during the period.

(f) Korean IFRS 1041 'Agriculture'- Taxation in fair value measurements

The amendment removes the requirement in paragraph 22 of KIFRS 1041 that entities exclude cash flows for taxation when measuring the fair value of assets within the scope of KIFRS 1041. These amendments had no impact on the consolidated financial statements of the Group as it did not have assets in scope of KIFRS 1041 as of the reporting date.

2.2.2 New and amended standards not yet adopted by the Group

The following new accounting standards and interpretations have been published that are not mandatory for December 31, 2022 reporting periods and have not been early adopted by the Group.

(a) Korean IFRS 1117 Insurance Contract

In 2021, KIFRS 1117 'Insurance Contracts', a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. Once effective, KIFRS 1117 will replace KIFRS 1104 Insurance Contracts that was issued in 2007.

KIFRS 1117 applies to all types of insurance contracts (i.e., life, non-life, direct insurance and re-insurance), regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. A few scope exceptions will apply. The overall objective of KIFRS 1117 is to provide an accounting model for insurance contracts that is more useful and consistent for insurers.

In contrast to the requirements in KIFRS 1104, which are largely based on grandfathering previous local accounting policies, KIFRS 1117 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects. The core of KIFRS 1117 is the general model, supplemented by:

- · A specific adaptation for contracts with direct participation features (the variable fee approach); and
- A simplified approach (the premium allocation approach) mainly for short-duration contracts.

This standard is effective for annual periods beginning on or after January 1, 2023, with comparative figures required. Early application is permitted, provided the entity also applies KIFRS 1109 and KIFRS 1115 on or before the date it first applies KIFRS 1117. This standard is not applicable to the Group.

(b) Amendments to Korean IFRS 1001 Presentation of Financial Statements - Classification of Liabilities as Current or Non-current

The amendments to Paragraphs 69–76 of Korean IFRS 1001 clarify the following requirements for the classification of liabilities as current and non-current.

- The definition of right to defer settlement of a liability
- The right to defer settlement of a liability must exist at the end of the reporting period
- Classification of a liability is unaffected by the likelihood that the entity will exercise its right to defer settlement of the liability
- Classification of a liability is unaffected by the terms of the liability only if the embedded derivative
 of the convertible liability is an equity instrument

The amendments shall be applied for annual periods beginning on or after 1 January 2023 and applied retrospectively. The Group performs evaluation of the impact of the amendments on accounting practices and whether existing loan agreements need to be renegotiated.

(c) Amendments to Korean IFRS 1008 Accounting policies, changes in accounting estimates and errors - Definition of Accounting Estimates

The amendments clearly distinguish between changes in accounting estimates, changes in accounting policies and corrections of errors. The amendments also clarify how to use measurement techniques and inputs to develop accounting estimates.

The amendments should be applied to changes in accounting policies and accounting estimates that occur for annual reporting periods beginning on or after January 1, 2023, and earlier application is permitted. The Group expect that the amendments do not have a significant impact on the consolidated financial statements.

(d) Amendments to Korean IFRS 1001 Presentation of Financial Statements - Disclosure of Accounting Policies

The amendments provide requirements and guidelines to help disclosures of the Group's accounting policy more effective. Korean IFRS 1001 requires disclosure of significant accounting policies of the Group. The amendments replace the significant accounting policies with the material accounting policies and include additional description regarding material accounting policy information. The Group provides more useful accounting policy information when determining about accounting policy disclosures.

The amendments should be applied for annual periods beginning on or after January 1, 2023, and earlier application is permitted. The Group reviews disclosure of disclosures of the Group's accounting policy accounting policy information to ensure that it is consistent with the requirements of this amendment.

(e) Amendments to Korean IFRS 1012 Income Taxes - Deferred Tax related to Assets and Liabilities arising from a Single Transaction

The amendments narrowed the scope of the recognition exemption in Korean IFRS 1012 so that it no longer applies to transactions that, on initial recognition, give rise to equal taxable and deductible temporary differences.

The amendments shall be applied to transactions occur after the beginning of the earliest comparative period presented. In addition, deferred tax assets (to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilized) and deferred tax liabilities for all deductible and taxable temporary differences, associated with lease and restoration and similar liabilities, should be recognized at the beginning of the earliest comparative period presented. The Group performs evaluation of the impact of the amendments on the consolidated financial statements.

2.2.3 Application of Financial Reporting in Hyperinflationary Economy of Turkiye

(a) In applying Korean IFRS 1029 Financial Reporting in Hyperinflationary Economies in accordance with the hyperinflationary situation in Turkiye in 2022, the Consumer Price Index (CPI) announced by the Turkish Statistical Institute was used. The CPI as of the end of each quarters of 2022 and 2021 announced by the Turkish Statistical Institute is as follows:

	1Q	2Q	3Q	4Q
2021	523.53	547.48	570.66	686.95
2022	843.64	977.90	1,046.89	1,128.45

- (b) The Group restated the financial statements of Hankook Lastikleri A.S., a subsidiary located in Turkiye, in accordance with Korean IFRS 1029. The Group reflected the effects of initial application of Korean IFRS 1029 as other components of equity, and the standards of restating consolidated financial statements are as follows:
 - The consolidated financial statements are presented based on historical cost.
 - Monetary assets and liabilities are not remeasured since those amounts are already presented in the measurement unit at the end of the reporting period.
 - Non-monetary assets and liabilities are remeasured by considering the inflation rate at the end of the reporting period from the time of acquisition.
 - Effects of increase or decrease in purchasing power due to retention of net monetary assets in hyperinflationary economies are presented as loss incurred from net monetary assets in the consolidated statement of comprehensive income.
 - For the exchange rate for translation to the presentation currency, the exchange rate at the end of reporting period is applied in accordance with Korean IFRS 1021 The Effects of Changes in Foreign Exchange Rates.

2.3 Consolidation

The Group has prepared the consolidated financial statements in accordance with Korean IFRS 1110 Consolidation Financial Statements.

(a) Subsidiaries

Subsidiaries are all entities over which the Group has control. The Group controls an entity when the Group is exposed to, or has right to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

The acquisition method of accounting is used to account for business combinations by the Group. The consideration transferred is measured at the fair values of the assets transferred, and identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. The Group recognizes any non-controlling interest in the acquired entity on an acquisition basis either at fair value or at the non-controlling interest's proportionate share of the acquired entity's net identifiable assets. All other non-controlling interests are measured at fair values, unless otherwise required by other standards. Acquisition-related costs are expended as incurred.

The excess of consideration transferred, amount of any non-controlling interest in the acquired entity and acquisition-date fair value of any previous equity interest in the acquired entity over the fair value of the net identifiable assets of the business acquired, the difference is recognized directly in the profit or loss as a bargain purchase.

Intercompany transactions, balances and unrealized gains on transactions between group companies are eliminated. Unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

Non-controlling interests at the acquisition date are measured at the present ownership instruments' proportionate share in the recognized amounts of the acquiree's identifiable net assets. Changes in a parent's ownership interest that do not result in a loss of control are accounted for as equity transactions.

The Group treats transactions with non-controlling interests that do not result in a loss of control as transactions with equity owners of the Group. A changed in ownership interest results in an adjustment between the carrying amounts of the controlling and non-controlling interest to reflect their relative interest in the subsidiary. Any difference between the amount of the adjustment to non-controlling interest and any consideration paid or received is recognized in a separate reserve with equity attributable to owners of the Parent Company.

When the Group ceases to consolidate for a subsidiary because of a loss of control, any retained interest in the subsidiary is remeasured to its fair value with the changed in carrying amount recognized in profit or loss.

(b) Associates

Associates are entities over which the Group has significant influence but not control or joint control. Investments in associates are accounted for using the equity method of accounting, after initially being recognized at cost. Unrealized gains on transactions between the Group and its associates are eliminated to the extent of the Group's interest in the associates. If the Group's share of losses of an associate equals or exceeds its interest in the associate (including long-term interests that, in substance, form part of the Group's net investment in the associate), the Group discontinues recognizing its share of further losses. After the Group's interest is reduced to zero, additional losses are provided for, and a liability is recognized, only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate. If there is objective evidence of impairment for the investment in the associate, the Group recognizes the difference between the recoverable amount of the associate and its book amount as impairment loss. If an associate uses accounting policies other than those of the Group for like transations and events in similar circumstances, if necessary, adjustments shall be made to make the associates accounting policies conform to those of the Group when the associate's financial statements are used by the Group in applying the equity method.

(c) Joint Arrangements

A joint arrangement, wherein two or more parties have joint control, is classified as either a joint operation or a joint venture. A joint operator recognizes its direct right to the assets, liabilities, revenues and expenses of joint operations and its share of any jointly held or incurred assets, liabilities, revenues and expenses. Interests in joint ventures are accounted for using the equity method, after initially being recognized at cost in the consolidated statement of financial position.

2.4 Foreign Currency Translation

(a) Functional and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which each entity operates (the "functional currency"). The consolidated financial statements are presented in Korean won, which is the Group's functional and presentation currency.

(b) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates are generally recognized in profit or loss. They are deferred in other comprehensive income if they relate to qualifying cash flow hedges and qualifying effective portion of net investment hedges or are attributable to monetary part of the net investment in a foreign operation.

Foreign exchange gains and losses that relate to borrowings are presented in the statement of profit or loss, within finance costs. All other foreign exchange gains and losses are presented in the statement of profit or loss within 'other income or other expenses'.

Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. Translation differences on assets and liabilities carried at fair value are reported as part of the fair value gain or loss. For example, translation differences on non-monetary assets and liabilities such as equities held at fair value through profit or loss are recognized in profit or loss as part of the fair value gain or loss and translation differences on non-monetary assets such as equities classified as available-for-sale financial assets are recognized in other comprehensive income.

(c) Transactions to the presentation currency

The results and financial position of foreign operations that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- Assets and liabilities for each statement of financial position presented are translated at the closing rate at the end of reporting period,
- Income and expenses for each statement of profit or loss are translated at average exchange rates,
- All resulting exchange differences are recognized in other comprehensive income.

When the Group ceases to control a subsidiary, exchange differences that were recorded in equity are recognized in the consolidated statements of comprehensive income as part of the gain or loss on sale.

Goodwill and fair value adjustments arising on the acquisition of a foreign operation are treated as assets and liabilities of the Group and translated at the closing rate at the end of the reporting period.

2.5 Financial Assets

(a) Classification

The Group classifies its financial assets in the following measurement categories:

- those to be measured at fair value through profit or loss
- · those to be measured at fair value through other comprehensive income, and
- those to be measured at amortized cos

The classification depends on the Group's business model for managing the financial assets and the contractual terms of the cash flows.

For financial assets measured at fair value, gains and losses will either be recorded in profit or loss or other comprehensive income. For investments in debt instruments, this will depend on the business model in which the investment is held. The Group reclassifies debt investments when, and only when its business model for managing those assets changes.

For investments in equity instruments that are not held for trading, this will depend on whether the Group has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income.

(b) Measurement

At initial recognition, the Group measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in profit or loss.

Financial assets with embedded derivatives are considered in their entirety when determining whether their cash flows are solely payment of principal and interest.

A. Debt instruments

Subsequent measurement of debt instruments depends on the Group's business model for managing the asset and the cash flow characteristics of the asset. The Group classifies its debt instruments into one of the following three measurement categories:

- Amortized cost: Assets that are held for collection of contractual cash flows where those cash flows
 represent solely payments of principal and interest are measured at amortized cost. A gain or loss
 on a debt investment that is subsequently measured at amortized cost and is not part of a hedging
 relationship is recognized in profit or loss when the asset is derecognized or impaired. Interest
 income from these financial assets is included in 'finance income' using the effective interest rate
 method.
- Fair value through other comprehensive income: Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at fair value through other comprehensive income. Movements in the carrying amount are taken through other comprehensive income, except for the recognition of impairment loss (reversal of impairment loss), interest income and foreign exchange gains and losses which are recognized in profit or loss. When the financial asset is derecognized, the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss. Interest income from these financial assets is included in 'finance income' using the effective interest rate method. Foreign exchange gains and losses are presented in 'other non-operating income or expenses' and impairment losses are presented in 'other non-operating expenses'.
- Fair value through profit or loss: Assets that do not meet the criteria for amortized cost or fair value through other comprehensive income are measured at fair value through profit or loss. A gain or loss on a debt investment that is subsequently measured at fair value through profit or loss and is not part of a hedging relationship is recognized in profit or loss and presented net in the statement of profit or loss within 'other non-operating income or expenses' in the year in which it arises.

B. Equity instruments

The Group subsequently measures all equity investments at fair value. Where the Group 's management has elected to present fair value gains and losses on equity investments, in other comprehensive income, there is no subsequent reclassification of fair value gains and losses to profit or loss following the derecognition of the investment. Dividend income from such investments continue to be recognized in profit or loss as 'finance income' when the right to receive payments is established.

Changes in the fair value of financial assets at fair value through profit or loss are recognized in 'other non-operating income and expenses' in the statement of profit or loss as applicable. Impairment loss (reversal of impairment loss) on equity investments measured at fair value through other comprehensive income are not reported separately from other changes in fair value.

(c) Impairment

The Group assesses on a forward looking basis the expected credit losses associated with its debt instruments carried at amortized cost and fair value through other comprehensive income. The impairment methodology applied depends on whether there has been a significant increase in credit risk. For trade receivables, the Group applies the simplified approach, which requires expected lifetime credit losses to be recognized from initial recognition of the receivables. (Note 43 provides more detail of how the Group determines there has been a significant increase in credit risk.)

(d) Recognition and Derecognition

Regular way purchases and sales of financial assets are recognized or derecognized on trade-date, the date on which the Group commits to purchase or sell the asset. Financial assets are derecognized when the rights to receive cash flows from the financial assets have expired or have been transferred and the Group has transferred substantially all the risks and rewards of ownership.

If a transfer does not result in derecognition because the Group has retained substantially all the risks and rewards of ownership of the transferred asset, the Group continues to recognize the transferred asset in its entirety and recognizes a financial liability for the consideration received. The Group classified the financial liability as "borrowings" in the statement of financial position.

(e) Offsetting of financial instruments

Financial assets and liabilities are offset, and the net amount reported in the statements of financial position where there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the assets and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Group or the counterparty.

2.6 Derivative Instruments and Hedge Accounting

Derivatives are initially recognized at fair value on the date when a derivative contract is entered into and are subsequently remeasured at their fair value at the end of each reporting period. Changes in the fair value of any derivative instrument that does not qualify for hedge accounting are recognized immediately in profit or loss as 'other non-operating income (expenses)' or 'finance income (costs)' based on the nature of transactions.

For the purpose of hedge accounting, hedges are classified as:

- Fair value hedges when hedging the exposure to changes in the fair value of a recognized asset or liability or an unrecognized firm commitment
- Cash flow hedges when hedging the exposure to variability in cash flows that is either attributable to a particular risk associated with a recognized asset or liability or a highly probable forecast transaction or the foreign currency risk in an unrecognized firm commitment
- Hedges of a net investment in a foreign operation

At the inception of a hedge relationship, the Group formally designates and documents the hedge relationship to which the Group wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge.

The documentation includes identification of the hedging instrument, the hedged item, the nature of the risk being hedged and how the Group will assess whether the hedging relationship meets the hedge effectiveness requirements (including the analysis of sources of hedge ineffectiveness and how the hedge ratio is determined). A hedging relationship qualifies for hedge accounting if it meets all of the following effectiveness requirements:

- There is 'an economic relationship' between the hedged item and the hedging instrument.
- The effect of credit risk does not 'dominate the value changes' that result from that economic relationship.
- The hedge ratio of the hedging relationship is the same as that resulting from the quantity of the hedged item that the Group actually hedges and the quantity of the hedging instrument that the Group actually uses to hedge that quantity of hedged item.

Hedges that meet the strict criteria for hedge accounting are accounted for, as described below:

The effective portion of the gain or loss on the hedging instrument is recognized in OCI in the cash flow hedge reserve, while any ineffective portion is recognized immediately in the statement of profit or loss. The cash flow hedge reserve is adjusted to the lower of the cumulative gain or loss on the hedging instrument and the cumulative change in fair value of the hedged item.

The amounts accumulated in OCI are accounted for, depending on the nature of the underlying hedged transaction.

If the hedged transaction subsequently results in the recognition of a non-financial item, the amount accumulated in equity is removed from the separate component of equity and included in the initial cost or other carrying amount of the hedged asset or liability. This is not a reclassification adjustment and will not be recognized in OCI for the period. This also applies where the hedged forecast transaction of a non-financial asset or non-financial liability subsequently becomes a firm commitment for which fair value hedge accounting is applied.

For any other cash flow hedges, the amount accumulated in OCI is reclassified to profit or loss as a reclassification adjustment in the same period or periods during which the hedged cash flows affect profit or loss.

If cash flow hedge accounting is discontinued, the amount that has been accumulated in OCI must remain in accumulated OCI if the hedged future cash flows are still expected to occur. Otherwise, the amount will be immediately reclassified to profit or loss as a reclassification adjustment. After discontinuation, once the hedged cash flow occurs, any amount remaining in accumulated OCI must be accounted for depending on the nature of the underlying transaction as described above.

2.7 Trade Receivables

Trade receivables are recognized initially at the amount of consideration that is unconditional, unless they contain significant financing components when they are recognized at fair value. Trade receivables are subsequently measured at amortized cost using the effective interest method, less loss allowance. (Note 9)

2.8 Inventories

Inventories are stated at the lower of cost and net realizable value. Cost is determined using the following method:

Type of inventories

Finished goods and work in process
Raw materials, merchandise and supplies
Materials in transit

Costing method

Weighted-average method Moving-weighted average method Specific identification method

In addition, if the actual level of production is below the normal capacity, the allocation of fixed manufacturing overheads to each unit of product is based on the normal capacity, and the unallocated fixed manufacturing overheads (loss of capacity) are recognized as an expense in the period in which they are incurred.

2.9 Non-current Assets (or Disposal Group) Held for sale

Non-current assets (or disposal group) are classified as held for sale when their carrying amount will be recovered principally through a sale transaction rather than through continuing use and a sale is considered highly probable. The assets are measured at the lower amount between their carrying amount and the fair value less costs to sell.

2.10 Property, Plant and Equipment

Property, plant and equipment are stated at historical cost less accumulated depreciation and accumulated impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Depreciation of all property, plant and equipment, except for land, is calculated using the straight-line method to allocate their cost or revalued amounts, net of their residual values, over their estimated useful lives as follows:

	Useful lives	
Buildings	13 – 60 years	_
Structures	2 - 50	
Machinery	2 - 18	
Vehicles	2 - 10	
Tools, furniture and fixtures	2 - 30	
Molds	8	
Right-of-use assets	1 - 32	

The assets' depreciation method, residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

2.11 Borrowing Costs

General and specific borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalized during the period time that is required to complete and prepare the asset for its intended use or sale. Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization. Other borrowing costs are expensed in the period in which they are incurred.

2.12 Government Grants

Grants from the government are recognized at their fair value where there is a reasonable assurance that the grant will be received, and the Group will comply with all attached conditions. Government grants related to assets are presented in the statement of financial position either by deducting the grant in arriving at the carrying amount of the asset, and government grants related to costs are deferred and recognized in the profit or loss over the period necessary to match them with the costs that they are intended to compensate

2.13 Intangible Assets

Goodwill is measured as described in Note 2.3.(a), and carried at cost less accumulated impairment losses.

Intangible assets are initially recognized at its historical cost and carried at cost less accumulated amortization and accumulated impairment losses.

Software development costs that are internally generated by the Group are recognized as intangible assets when the criteria including technical feasibility and probability of generating future economic benefits are met. Membership rights are regarded as intangible assets with indefinite useful life and not amortized because there is no foreseeable limit to the period over which the assets are expected to be utilized. The Group amortizes intangible assets with a limited useful life using the straight-line method over the following periods:

	Useful lives
Industrial property rights	5 – 10 years
Other intangible assets	3 – 50
Brand and customer relationship	5 – 20

2.14 Investment Property

Investment property(including right-of-use assets) is property held to earn rentals or for capital appreciation or both. An investment property is measured initially at its cost. An investment property is measured after initial measurement at depreciated cost (less any accumulated impairment losses). After recognition as an asset, investment property is carried at cost less accumulated depreciation and impairment losses. The Group depreciates investment properties, except for land, using the straight-line method and estimated useful lives are 40 years

2.15 Impairment of Non-financial Assets

Goodwill and intangible assets that have an indefinite useful life are not subject to amortization and are tested annually for impairment, or more frequently if events or changes in circumstances indicate that they might be impaired. Other assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

2.16 Trade and Other Payables

These amounts represent liabilities for goods and services provided to the Group prior to the end of reporting period which are unpaid. The amounts are unsecured and are usually paid within 30 days of recognition. Trade and other payables are presented as current liabilities unless payment is not due within 12 months after the reporting period. They are recognized initially at their fair value and subsequently measured at amortized cost using the effective interest method.

2.17 Financial Liabilities

(a) Classification and measurement

The Group's financial liabilities at fair value through profit or loss are financial instruments held for trading. A financial liability is held for trading if it is incurred principally for the purpose of repurchasing in the near term. A derivative that is not a designated as hedging instruments and an embedded derivative that is separated are also classified as held for trading.

The Group classifies non-derivative financial liabilities, except for financial liabilities at fair value through profit or loss, financial guarantee contracts and financial liabilities that arise when a transfer of financial assets does not qualify for derecognition, as financial liabilities carried at amortized cost and present as 'trade payables', 'borrowings', and 'other financial liabilities' in the statement of financial position.

Preferred shares that require mandatory redemption at a particular date are classified as liabilities. Interest expenses on these preferred shares using the effective interest method are recognized in the statement of profit or loss as 'finance costs', together with interest expenses recognized from other financial liabilities.

(b) Derecognition

Financial liabilities are removed from the statement of financial position when it is extinguished; for example, when the obligation specified in the contract is discharged or cancelled or expired or when the terms of an existing financial liability are substantially modified. The difference between the carrying amount of a financial liability extinguished or transferred to another party and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognized in profit or loss.

2.18 Financial Guarantee Contracts

Financial guarantee contracts are recognized as a financial liability at the time the guarantee is issued. The liability is initially measured at fair value, subsequently at the higher of following:

- the amount determined in accordance with the expected credit loss model under Korean IFRS 1109 Financial Instruments and
- the amount initially recognized less, where appropriate, the cumulative amount of income recognized in accordance with Korean IFRS 1115 Revenue from Contracts with Customers

The liability is recognized in the statement of financial position within 'other financial liabilities'.

2.19 Provisions

Provisions are recognized when the Group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and the amount can be reliably estimated. Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period, and the increase in the provision due to the passage of time is recognized as interest expense.

2.20 Current and Deferred Tax

The tax expense for the period consists of current and deferred tax. Current and deferred tax is recognized in profit or loss, except to the extent that it relates to items recognized in other comprehensive income or directly in equity. In this case, the tax is also recognized in other comprehensive income or directly in equity, respectively.

The current income tax expense is measured at the amount expected to be paid to the taxation authorities, using the tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. The Group recognizes current income tax based on amounts expected to be paid to the tax authorities.

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting profit nor taxable profit or loss.

Deferred tax assets are recognized only if it is probable that future taxable amounts will be available to utilize those temporary differences and losses.

The Group recognizes a deferred tax liability all taxable temporary differences associated with investments in subsidiaries, associates, and interests in joint arrangements, except to the extent that the Group is able to control the timing of the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. In addition, The Group recognizes a deferred tax asset for all deductible temporary differences arising from such investments to the extent that it is probable the temporary difference will reverse in the foreseeable future and taxable profit will be available against which the temporary difference can be utilized.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intend to settle on a net basis.

2.21 Employee Benefits

(a) Post-employment benefits

The Group operates both defined contribution and defined benefit pension plans.

For defined contribution plans, the Group pays contribution to publicly or privately administered pension insurance plans on mandatory, contractual or voluntary basis. The Group has no further payment obligation once the contribution has been paid. The contribution are recognized as employee benefit expense when they are due.

A defined benefit plan is a pension plan that is not a defined contribution plan. Generally, post- employment benefits are payable after the completion of employment, and the benefit amount depended on the employee's age, periods of service or salary levels. The liability recognized in the statement of financial position in respect of defined benefit pension plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms approximating to the terms of the related obligation. Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognized in the period in which they occur, directly in other comprehensive income.

Changes in the present value of the defined benefit obligation resulting from plan amendments or curtailments are recognized immediately in profit or loss as past service costs.

(b) Other long-term employee benefits

Certain entities within the Group provide long-term employee benefits that are entitled to employees with service period for ten years and above. The expected costs of these benefits are accrued over the period of employment using the same accounting methodology as used for defined benefit pension plans. The Group recognizes service cost, net interest on other long- term employee benefits and remeasurements as profit or loss for the year. These liabilities are valued annually by an independent qualified actuary.

2.22 Revenue Recognition

(a) Identifying the performance obligations

With regard to the contract of selling products to the customer, the Group identifies the services rendered separately to the customer as a different performance obligation. When entering into contracts with customers for the sales of products, The Group determines standard warranty coverage periods per product and customer considering warranty periods required by law and others when entering into contracts with customers for the sales of products. If the Group provides an extended warranty beyond the standard warranty coverage period or a customer has the option to purchase an additional warranty separately, the warranty is considered as a separate performance obligation when revenue is recognized.

(b) A performance obligation satisfied at a point in time

The revenue from the sale of goods is recognized when the products have been delivered to the customer. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the customer, and either the customer has accepted the products in accordance with the sales contract, the acceptance provisions have lapsed, or the Group has objective evidence that all criteria for acceptance have been satisfied.

The goods are often sold with volume discounts, and it is the Group's policy to sell its products to the customer with a right of return. Accumulated experience is used to estimate for the discounts and the refund, and the volume discounts is calculated based on the periodical forecast sales. The warranty provision for the sales and refund is reasonably estimated and recognized properly.

(c) Significant financing component

As a practical expedient, the Group need not adjust the promised amount of consideration for the effects of a significant financing component as the period between when the entity transfers a promised good or service to a customer and when the customer pays for that good or service is generally one year or less.

(d) Interest income

Interest income is recognized using the effective interest method according to the time passed. When a loan and receivable is impaired, the Group reduces the carrying amount to its recoverable amount and continues unwinding the discount as interest income. Interest income on impaired loans and receivables is recognized using the original effective interest rate.

(e) Dividend income

Dividend income is recognized when the right to receive payment is established.

2.23 Leases

(a) Lessor

A lessor shall classify each of its leases as either an operating lease or a finance lease in inception of lease.

For the purposes of classifying the lease, the Group generally determines whether it transfers substantially all the risks and rewards incidental to ownership of an underlying asset. A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership of an underlying asset, and if not, it is classified as an operating lease.

Lease income from the operating leases where the Group is a lessor is recognized in income on a straightline basis over the lease term, Initial direct costs incurred in obtaining an operating lease are added to the carrying amount of the underlying asset and recognized as expense over the lease term on the same basis as lease income. The respective leased assets are included in the statement of financial position based on their nature.

(b) Lessee

The Group leases various warehouses, equipment, cars and others. Lease contracts are typically made for fixed periods but may have extension options as described below.

Contracts may contain both lease and non-lease components. The Group allocates the consideration in the contract to the lease and non-lease components based on their relative stand- alone prices. However, for leases of real estate for which the Group is lessee, the Group applies the practical expedient which has elected not to separate lease and non-lease components and instead accounts for these as a single lease component.

Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The lease agreements do not impose any covenants, but leased assets may not be used as security for borrowing purposes.

The Group determines the lease term as the non-cancellable period of a lease, together with both (a) periods covered by an option to extend the lease if the lessee is reasonably certain to exercise that option; and (b) periods covered by an option to terminate the lease if the lessee is reasonably certain not to exercise that option. When the lessee and the lessor each has the right to terminate the lease without permission from the other party, the Group should consider a termination penalty in determining the period for which the contract is enforceable.

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- Fixed payments (including in-substance fixed payments), less any lease incentives receivable
- Variable lease payment that are based on an index or a rate, initially measured using the index or rate as of the commencement date
- Amounts expected to be payable by the Group (the lessee) under residual value guarantees
- The exercise price of a purchase option if the Group (the lessee) is reasonably certain to exercise that option, and
- Payments of penalties for terminating the lease, if the lease term reflects the Group (the lessee) exercising that option

Measurement of lease liability also includes payments to be made in optional periods if the lessee is reasonably certain to exercise an option to extend the lease.

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be determined, the lessee's incremental borrowing rate is used, being the rate that the lessee would have to pay to borrow the funds necessary to obtain an asset of similar value in a similar economic environment with similar terms and conditions.

To determine the incremental borrowing rate, the Group:

- where possible, uses recent third-party financing received by the individual lessee as a starting point, adjusted to reflect changes in financing conditions since third party financing was received
- uses a build-up approach that starts with a risk-free interest rate adjusted for credit risk for leases held by corporation which does not have recent third-party financing, and
- makes adjustments specific to the lease, for example term, country, currency and security.

When an individual lessee can readily observe (through recent financial or market data) the interest rate on an amortizing loan with a similar payment schedule to the lease, the Group refers to the rate as a starting point when determining its incremental borrowing rate for a lease.

The Group is exposed to potential future increases in variable lease payments based on an index or rate, which are not included in the lease liability until they take effect. When adjustments to lease payments based on an index or rate take effect, the lease liability is reassessed and adjusted against the right-of-use asset.

Right-of-use assets are measured at cost comprising the following:

- the amount of the initial measurement of lease liability
- any lease payments made at or before the commencement date less any lease incentives received
- · any initial direct costs, and
- restoration costs

The right-of-use asset is depreciated over the shorter of the asset's useful life and the lease term on a straightline basis. If the Group is reasonably certain to exercise a purchase option, the right-of-use asset is depreciated over the underlying asset's useful life.

Payments associated with short-term leases of equipment and vehicles and leases of low-value assets are recognized on a straight-line basis as an expense in profit or loss. Short-term leases are leases with a lease term of 12 months or less. Low-value assets comprise IT-equipment and office furniture.

2.24 Greenhouse Gas Emission Permits and Obligations

(a) Emission permits and emission obligations for compliance

With enforcement of The Act on the Allocation and Trading of Greenhouse Gas Emission Permits, emission permits that are allocated free of charge from the government are measured at zero, and emission permits purchased are recognized at acquisition cost by including any directly attributable costs incurred during the normal course of business. Emission permits are carried at cost less accumulated impairment losses, and those to be submitted to the government within one year from the end of reporting period are classified as current assets.

Emission obligation is a present obligation of submitting the allowances to the government. Emissions obligations are measured as the sum of the carrying amount of the allocated allowances that will be submitted to the government and the best estimate of expenditure required to settle the obligation at the end of reporting period for any excess emission. The emission obligations to be settled within one year from the end of the reporting period are classified as current liabilities.

The Group derecognizes the emission permits when the emission allowance is disposed or submitted to government or becomes unable to be disposed or submitted and accordingly, the future economic benefits are no longer expected to be probable. The Group derecognizes the emission obligations when the Group submits the emission permits to the government. The emission permits and emission obligations are classified as intangible assets and provisions, respectively, in the statement of financial position.

(b) Emission permits held for trading

Emission permits held for trading are classified as current assets and measured at fair value, and changes in fair value are recognized as profit or loss for the year. Changes in fair value and gain (loss) on disposal are recognized as other income and other expenses, respectively.

2.25 Segment Reporting

Information of each operating segment is reported in a manner consistent with the internal business segment reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Board of Directors that makes strategic decisions.

2.26 Approval of Issuance of the Financial Statements

The consolidated financial statements 2022 were approved for issue by the Board of Directors on February 27, 2023 and are subject to change with the approval of shareholders at their Annual General Meeting.

3. Critical Accounting Estimates and Assumptions

The preparation of financial statements requires the Group to make estimates and assumptions concerning the future. Management also needs to exercise judgement in applying the Group's accounting policies. Estimates and assumptions are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. As the resulting accounting estimates will, by definition, seldom equal the related actual results, it can contain a significant risk of causing a material adjustment.

The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below. Additional information of significant judgement and assumptions of certain items are included in relevant notes.

(a) Estimated goodwill impairment

The Group tests whether goodwill has suffered any impairment on an annual basis. The recoverable amount of a cash generating until (CGU) is determined based on value-in-use calculations (Note 16).

(b) Income taxes

The Group 's taxable income generated from these operations are subject to income taxes based on tax laws and interpretations of tax authorities in numerous jurisdictions. There are many transactions and calculations for which the ultimate tax determination is uncertain.

When a certain amount of taxable income has not been used for investment, wage increase and so on, for a certain period, the Group will bear the additional corporate tax calculated according to the method specified by the tax law. Therefore, when measuring the current and deferred tax for the current period, the effect of the tax should be reflected. As the Group's income tax is dependent on the investments, increase in wages and dividends, there is an uncertainty measuring the final tax effects (Note 36).

(c) Fair value of financial instruments

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. The Group uses its judgment to select a variety of methods and make assumptions that are mainly based on market conditions existing at the end of each reporting period (Note 5).

(d) Impairment of financial assets

The provision for impairment for financial assets is based on assumptions about risk of default and expected loss rates. The Group uses judgement in making these assumptions and selecting the inputs to the impairment calculation based on the Group's history, existing market conditions as well as forward looking estimates at the end of each reporting period (Note 43).

(e) Net defined benefit liability

The present value of net defined benefit liability depends on a number of factors that are determined on an actuarial basis using a number of assumptions including the discount rate (Note 21).

(f) Provisions

The Group recognizes provision for warranty on products sold. The Group accrues provision for warranty based on the best estimate of amounts necessary to settle future and existing claims. The amounts are estimated based on past experience (Note 22).

(g) Valuation of inventories

Inventories are stated at the lower of cost and net realizable value. Estimates of net realizable value are based on the most reliable evidence available at the time the estimates are made, of the amount the inventories are expected to realize. These estimates take into consideration fluctuations of price or cost directly relating to past experience, current market conditions and events occurring after the end of the period to the extent that such events confirm conditions existing at the end of the period (Note 10).

(h) Leases

In determining the lease term, management considers all facts and circumstances that create an economic incentive to exercise an extension option, or not exercise a termination option. Extension options (or periods after termination options) are only included in the lease term if the lease is reasonably certain to be extended (or not terminated) (Note 15).

(i) Impact of Coronavirus disease 2019 ("COVID-19")

The spread of Coronavirus disease 2019 ("COVID-19") has a material impact on the global economy. It may have a negative impact, such as, decrease in productivity, decrease or delay in sales, collection of existing receivables and others. Accordingly, it may have a negative impact on the financial position and financial performance of the Group.

Significant accounting estimates and assumptions applied in the preparation of the financial statements can be adjusted depending on changes in the uncertainty from COVID-19. Also, the ultimate effect of COVID-19 to the Group's business, financial position and financial performance cannot presently be determined.

(j) Uncertainty of the impact of the situation in Ukraine

In February 2022, a dispute broke out between Russia and Ukraine, and international sanctions have been imposed in Russia. Due to measured such as restrictions on access to the SWIFT payment system of Russian banks, shortage of liquidity in the Russian foreign exchange market, the depreciation of ruble, and the decline in the share value of Russian companies and others are in progress. This may lead to a decrease in the value of financial assets or operating assets held by the Group in relation to the disputed country, an increase in the payback period, restrictions on transfer of funds, and a decrease in profits. The ultimate impact of these disputes and sanctions on the financial position and operating performance of the Group is cannot presently be determined.

(k) Introduction and Impact of the Global Minimum Tax

The Organization for Economic Co-operation and Development (OECD)/G20 Inclusive Framework on Base Erosion and Profit Shifting (BEPS) addresses the tax challenges arising from the digitalization of the global economy. Global Minimum Tax (Pillar Two) were released and they apply to Multinational Enterprises (MNEs) with revenue in excess of EUR 750 million per their consolidated financial statements.

National Assembly of South Korea passed into law new Global Minimum Tax rules to align with the OECD BEPS Pillar Two in December 2022. The regulation will be included in the Adjustment of International Taxes Act and will be effective for fiscal years beginning on or after January 1, 2024. However, the Enforcement Decrees that provide further detail on the application of the legislation is not yet finalized as of December 31, 2022.

In South Korea, Pillar Two legislation is not yet considered substantively enacted as of December 31, 2022 for financial reporting purposes. The Group therefore has not recognized any tax effect arising from the Global Minimum Tax in its consolidated financial statements as of December 31, 2022 and for the year then ended.

4. Financial Risk Management

(a) Capital management

The Group manages its capital to ensure that entities under the Group will be able to continue while maximizing the return to shareholders through the optimization of its debt and equity balance. The Group's overall strategy remains unchanged from that of the prior periods. The Group utilizes the debt ratio as capital management index, which is the total liabilities divided by the total equity. Total liabilities and total equity are based on the amounts stated in the consolidated financial statements. The Group is not subject to any externally imposed capital requirements.

The debt ratios as of December 31, 2022 and 2021, are as follows:

(in thousands of Korean won)		2022	2021			
Total liabilities	₩	3,705,654,911	₩	3,498,782,298		
Total equity		8,875,709,248		8,195,514,290		
Debt ratio		41.75%		42.69%		

(b) The significant accounting policies and methods (including recognition, measurement and related gain and loss recognition) adopted for the Group's financial assets, financial liabilities and equity are detailed in Note 2. Financial instrument category for financial assets and financial liabilities at the end of the reporting period are detailed in Note 6

(c) Financial risk management

1) Purpose of financial risk management

The Group is exposed to various risks related to its financial instruments, such as market risk (currency risk, fair value interest rate risk and price risk), credit risk, liquidity risk and cash flow interest rate risk. The finance department of the Group manages operations, organizes the approach to financial market and controls the financial risks related to operations of the Group through internal risk reports, which analyze the scope and degree of each risk factor.

The Group uses derivative financial instruments to hedge these risks. The use of derivatives is decided in the observance of the Group's polices approved by the Board of Directors. They provide the documented principles of currency risk, interest rate risk, credit risk, use of derivatives/non-derivatives and excessive liquidity investments. The audit committee constantly oversees the observance of the policies and the degree of risk exposure. The Group does not trade the financial instruments, including derivatives for the purpose of speculation.

2) Market risk

The Group's activities are mainly exposed to financial risks of changes in currency and interest rates. The Group makes derivative contracts to manage the interest rate risk and foreign currency rate risk.

a) Foreign currency risk management

The Group undertakes transactions denominated in foreign currencies; consequently, exposures to exchange rate fluctuations arise. Subsidiaries of the Group mainly conduct transactions in each company's functional currency, and the parent company, exposed to foreign currency risk, manages exchange rate exposures within approved policy parameters utilizing forward foreign exchange contracts. In result, the Group manages mainly the foreign currency risk of the parent company. The sensitivity analysis includes outstanding monetary items denominated in foreign currencies, and foreign exchange translations are adjusted based on assumption that Korean won has weakened/strengthened by 10% at the end of the reporting period.

The table below summarizes the impact of weakened/strengthened Korean won on the Group's profit before tax for the year. The analysis is based on the assumption that Korean won has weakened/strengthened by 10% with all other variables held constant.

(in thousands of Korean won)		2022		2021			
10% Strengthened	₩	(39,405,806)	₩	66,849,292			
10% weakened		39,405,806	₩	(66,849,292)			

In order to reduce the impact of changes in exchange rates on future cash flows, the Group entered into foreign currency forward contracts. The outstanding forward contracts as of December 31, 2022 are as follows:

(in thousands of USD, EUR, MYR, AUD, GBP, JPY, CAD, SEK, THB)

(III tirododirido or oc	Contractively								
	Maturity date	Selling currency	Selling amount	Contract exchange rate	Buying Currency	Contractual inflow amount

J. W GIG GUIGIS	and others	OLIV	6,532	1.508	0.41	4,332			

b) Interest rate risk

Interest rate risk is defined as the risk that the interest income or expenses arising from the Group's investing and financing activities will fluctuate because of changes in market interest rate. In order to minimizing uncertainty caused by fluctuations in interest rates and minimizing finance costs, the Group monitors a fluctuation of domestic and foreign interest rates and establishes alternatives

When the interest rate of floating rate borrowings changes by 10bp while all other variables are constant, the effect on the Group's Profit before income tax as of December 31, 2022 and 2021, are as follows:

(in thousands of Korean won)			2022	2021			
10 bp	Increase Decrease	₩	(717,303) ₩ 717,303	(100,091) 100.091			

In orreduce the impact of changes in exchange rates on future cash flows of long-term debentures in foreign currency, the Group entered into currency swap contracts. A summary of derivative contracts as of December 31, 2022 is as follows:

(in thousands of USD	Contract amount	Contract exchange rate (KRW/USD)	KRW interest rate_pay (%)	Foreign currency interest rate_receive (%)	Contract commenceme nt date	Contract end date
Korea Develop Bank	USD 300,000 (total principal)	1061.50 ~ 1071.90	2.61 ~ 2.64	3.50	2018-01-25 ~ 2018-01-30	2023-01-30
SMBC	USD 100,000 (total principal)	1226.00	1.17	3M Libor+1.17	2020-05-15	2023-05-15

For currency swap contract, losses on valuation after tax of derivatives recognized in other comprehensive income amount to $\mbox{$\mbox{$$\mu$}$}$ 4,920,557 thousand (2021: $\mbox{$\mbox{$$\mu$}$}$ 488,535 thousand) (Note 8), and gains on valuation of derivatives amount to $\mbox{$\mbox{$$\mu$}$}$ 1,260,859 thousand (2021: $\mbox{$\mbox{$$\mu$}$}$ 671,546 thousand) are recognized in profit or loss for the year ended December 31, 2022.

In addition, the Group entered into an interest rate swap contract to hedge the risk of interest rate fluctuations related to borrowings from overseas subsidiaries, and the details of the derivative contract are as follows:

(in thousands of USD	Contract date Expiration date		Contacted amount (USD)	Interest rate (received) (%)	Interest rate (paid) (%)
Credit Agricole	2022-07-01	2023-04-17	80.000	Libor (3M) + 0.92	1.25

c) Other price risks

The Group is exposed to equity price risks arising from its equity investments. The below sensitivity analysis was performed based on stock price fluctuation risk at the end of the reporting period.

If the equity securities price has increased/decreased by 5%, the Group's other comprehensive income would be increased/decreased by ₩ 5,892,135 thousand (2021: ₩ 4,335,610 thousand) due to changes in financial assets at fair value and no change in profit or loss due to changes in fair value through profit or loss (2021: ₩ 1,484,509 thousand).

3) Credit risk management

Credit risk refers to risk of financial losses to the Group when the counterpart defaults on the obligations of the contracts. The Group has adopted a policy of only dealing with creditworthy counterparties and obtaining sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults. The Group only deals with the customers rated higher than investment grade by the independent credit rating agencies. If those grades are not available, customers' credit is evaluated upon their other financial information, sales figures and other factors posted publicly. The Group regularly monitors customers' credit ratings, checks on the credit risk exposure and readjusts deposit or aggregate amount of transactions. The aggregate risks are allocated to total portfolio of approved customers for diversification effect that are reviewed and approved annually by Foreign Exchange Risk Management Committee.

Credit ratings of trade receivables are evaluated constantly and credit guarantee contracts are made, if necessary. The maximum exposure to credit risk is not disclosed as the book amount of financial assets exposed to credit risk are the best presentation of the maximum exposure to credit risk.

4) Liquidity risk management

The Group has established an appropriate liquidity risk management framework for the management of the Group 's short-, medium- and long-term funding and liquidity management requirements. The Board of Directors has a full responsibility of the liquidity risk management. The Group manages liquidity risk by maintaining adequate reserves and credit facilities by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities. 'Financing Arrangements' (Note 41) explains details of unused balances of credit facility agreements entered through the Group's discretion to reduce the liquidity risk.

The table below illustrates remaining contractual maturity of non-derivative financial liabilities in detail. Contractual maturity is based on the earliest day when the payment can be claimed to the Group. Maturity analysis of non-derivative financial liabilities according to their remaining maturity at the end of the reporting period, are as follows:

(in thousands		2022											
of Korean won)	Contractual Cash							Residual value

¹Payables related to employee benefits are excluded.

As of December 31, 2022, gross settlement contracts consist of currency forward contract, which will be settled within 6 months. This contract is not included in above table and non-discounted contractual cash inflow/outflow from the contract is as follows:

(in thousands of Korean won)	20	022		2021		
Contractual cash inflow Contractual cash outflow	₩	615,556,606 617,131,540	₩	151,785,506 150,851,334		

5. Fair value

For the year ended December 31, 2022, there were no changes in business environment and economic environment that have significant impacts on the fair value of assets and liabilities of the Group.

5.1 Fair Value of Financial Instruments by Category

Carrying amount and fair value of financial instruments by category as of December 31, 2022 and 2021, are as follows:

(in thousands of Korean won)	2022				2021				
	Carr	ying amount		Fair value	Ca	rrying amount		Fair value	
Financial assets									
Financial assets at fair value									
through other									
comprehensive income	₩	166,538,583	₩	166,538,583	₩	87,229,257	₩	87,229,257	
Financial assets at fair value									
through profit or loss		363,295,250		363,295,250		548,217,731		548,217,731	
Financial derivative assets		91,585,290		91,585,290		43,545,296		43,545,296	
Financial liabilities									
Debentures		806,644,858		790,375,333		773,043,198		776,594,910	
Long-term borrowings		332,517,050		329,979,309		309,321,002		311,457,747	
Financial derivative liabilities		2,397,170		2,397,170		2,783,469		2,783,469	

Financial assets including trade and non-trade receivables, and financial liabilities at amortized cost except for debentures and long-term borrowings whose carrying amount is a reasonable approximation of fair value are excluded from the fair value disclosures.

5.2 Fair value Hierarchy

Items that are measured at fair value or for which the fair value is disclosed are categorized by the fair value hierarchy levels, and the defined levels are as follows:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1).
- All inputs other than quoted prices included in level 1 that are observable (either directly that is, prices, or indirectly that is, derived from prices) for the asset or liability (Level 2).
- Unobservable inputs for the asset or liability (Level 3).

Hankook Tire & Technology Co., Ltd. Notes to the Consolidated Financial Statements Year Ended December 31, 2022 and 2021

Fair value hierarchy classifications of the financial instruments that are measured at fair value as of December 31, 2022 and 2021, are as follows:

(in thousands of Korean won)		2022									
		Level 1		_evel 2		Level 3		Total

Net impairment loss(reversal)	₩	16,504,022 (3,042,499)	₩	409,033 361,977	₩	16,913,055 (2,680,522)					
	₩	, ,	₩	•	₩						
Net impairment loss(reversal)	₩	(3,042,499)	₩	361,977	₩	(2,680,522)					

(c) Credit risk and provision for impairment

The above trade receivables and other receivables are classified as financial assets measured at amortized cost. The Group considers a change of credit grade about trade receivables from starting date for granting credit to the end of reporting period to judge recoverability of trade receivables and others.

10. Inventories

Details of inventories as of December 31, 2022 and 2021, are as follows:

(in	thousands of	
Kο	rean won)	

Korean won)	2022											
	Acquisition Cost		Inventory valuation		Inventory valuation allowance		Exchange differences		Valuation loss(reversal)			
Finished goods	₩	1,683,648,549	₩	1,655,332,517	₩	28,316,032	₩	3,482,366	₩	(20,889,345)		
Merchandise		44,880,246		44,880,246		-		-		-

Total	₩	2,477,861,200	₩	2,449,545,168	₩	28,316,032	₩	3,482,366	₩	(20,914,237)		

(in thousands of Korean won)

Korean won)	2021											
	Acquisition Cost		Inventory valuation		Inventory valuation allowance		Exchange differences		Valuation ess(reversal)			
Finished goods	₩ 1,277,663,781	₩	1,231,940,770	₩	45,723,011	₩	2,750,076	₩	24,449,916			
Merchandise	37,375,320		37,375,320		-		-		-			
Work in process	47,181,729		47,181,729		-		-		-			
Raw materials	417,815,355		417,790,463		24,892		24,892		-			
Supplies	44,442,777		44,442,777		-		-		-			
Materials in transit	117,857,673		117,857,673				_					
Total	₩ 1,942,336,635	₩	1,896,588,732	₩	45,747,903	₩	2,774,968	₩	24,449,916			

The Group recognizes loss from inventory valuation and inventory shrinkage as expenses in the period in which the loss occurs. In addition, reversal of inventory write-downs due to an increase in the net realizable value of inventory assets is deducted from cost of sales recognized as an expense in the period in which the reversal occurs.

11. Other Financial Assets

(a) Details of other financial assets as of December 31, 2022 and 2021, are as follows:

(in thousands of Korean won)		20	22			2021				
		Current	N	on-Current		Current	Non-Current

- (c) Impairment Tests for Goodwill
- 1) Goodwill is allocated to each of the CGUs identified for each consolidated entity. Details of goodwill of each consolidated entity as of December 31, 2022 and 2021, are as follows:

(in thousands of Korean won)		2022	2021		
Manufacturing and sales of tires	₩	27,632,207	₩	27,632,207	
Distribution of tires		81,632,438		80,356,648	
None-tire business		42,327,228		42,327,228	
Total	₩	151,591,873	₩	150,316,083	

Goodwill impairment reviews are undertaken annually. As a result of impairment test, it is considered that the carrying value of cash generating units does not exceed the recoverable amount.

- 2) The recoverable amounts of all cash-generating units have been determined based on value-in-use calculations. These calculations use pre-tax cash flow projections based on a business plan approved by management covering five-years. Also, when measuring value in use, The Group estimated the cash flows assuming that COVID-19 would end within the estimated period. Cash flows beyond the five-years of the business plan are extrapolated using the estimated long-term growth rates stated below. The growth rate does not exceed the long-term average growth rate include in the related industry report.
- 3) Management determined the estimated pre-tax cash flow based on past performance and its expectations of market development. Value in use is measured by applying the discount rates reflecting specific risks relating to the relevant industry in which they operate. The key assumptions used as of December 31, 2022 are as follows:

(in percentage. %)	Annual growth rate		Long-term growth
	for sales	Discount rate	rate
Manufacturing and sales of tires	3.02	9.00	1.00
Distribution of tires	4.22~5.76	7.76~12.80	1.50~2.00
None-tire business	16.63	11.75	1.00

4) The results of the sensitivity analysis for impairment assessment according to changes in discount rate and long-term growth rate are as follows:

(in thousands of Korean won)	Amount of impairment							
	Manufacturing and sales of tires	Distribution of tires	None-tire business					
0.5% increase of discount rate	₩ -	₩ _	₩ _					
0.5% decrease of long-term growth								
rate	-	-	-					

17. Investment in Associates and Joint Ventures

(a) Details of the Group's investment in associates and joint ventures as of December 31, 2022 and 2021, are as follows:

(in thousands of Korean w	von)		2022						
	Closing month	Location	Percentage of ownership (%)	Acquisition cost	Book amount				
Hanon Systems Co., Ltd. ¹ , ²	December	Korea	19.49	₩ 1,061,740,386	₩ 1,059,375,373				
Peaches Group Korea Co. Ltd. ^{2, 3}	December	Korea	7.79	520,827	449,967

Preciseley									
Microtechnology	December	Canada	22.86	00 00 7 5- :	00 000 1				
Corporation ⁷				69,027,274	66,330,581				
	Total			₩ 1,172,755,487	₩ 1,177,113,111				

¹ As of December 31, 2022, the fair value of marketable investment in associate is ₩ 841,610,790 thousand (2021: ₩ 1,399,216,950 thousand).

- ⁵ For the year ended December 31, 2021, I&B Corporation Co., Ltd. was newly established. Although the Group's ownership interest in this entity is 100%, the investment was classified as investment in joint ventures as the investors who hold convertible notes issued by I&B Corporation Co., Ltd. Have authority to most of the associate's business operation (election of directors, etc).
- ⁶ Excluded from investment in associates due to the repurchase of Mirae Asset Core Plus professional investment type private equity investment trust for the year ended December 31, 2022.

² Even though the Group's equity interest in this entity is less than 20%, the investment was classified as investment in associates as the Group has authority to most of the associate's business operation (election of directors, etc.) by contract between shareholders.

³ Peaches Group Korea Co. Ltd is classified as investment in associates because the Group could exercise significant influence, and redeemable convertible preference shares of the entity owned by the Group are excluded from equity method considering that the shares are debt instruments.

⁴ As a collective investment vehicle invested by the Group, the investment was classified as investment in associates according to the requirement for ownership (20% or more). Meanwhile, as the standard price in the trust contract is set at KRW 1 per share, the number of stocks the Group owned is equal to the investment amount.

⁷ For the year ended December 31, 2022, the Group acquired 1,564,326 common stocks of Preciseley Microtechnology Corporation, a Canadian MEMS company, and classified it as an investment in associates according to the ownership requirement (20% or more).

(d) The significant actuarial assumptions used in defined benefit obligations assessment as of December 31, 2022 and 2021, are as follows:

(In percentage, %)	2022	2021
Discount rate	5.30 ~ 7.25	2.91 ~ 7.50
Salary growth rate	3.00 ~ 9.00	3.00 ~ 9.00

(e) While holding all other assumptions constant, if significant actuarial assumptions vary within a reasonable range, the effects on the defined benefit obligations are as follows:

(in thousands of Korean won)	2022						
		Increase	Decrease				
1% change of discount rate	₩	(33,734,318) W	39,548,965				
1% change of salary growth rate		39,901,039	(34,613,378)				
(in thousands of Korean won)		2021					
		Increase	Decrease				
1% change of discount rate	₩	(42,940,405) W	58,040,483				
1% change of salary growth rate		57,250,061	(43,186,326)				

(f) Plan assets as of December 31, 2022 and 2021, consist of:

- (b) Greenhouse Gas Emission Permits and Obligations
- 1) The quantities of emission permits which are allocated free of charge for the 3rd planning period (2021~2025) are as follows:

(in tC02-eq)	2021	2022	2023	2024	2025	Total
Allocation of emission						
Allowances free of charge	467,218	466,467	466,467	466,467	462,099	2,324,350

2) Details of emission rights received free of charge for each reporting period and greenhouse gas emission estimated by the Parent Company as of December 31, 2022 and 2021, are as follows:

(in tC02-eq)	2020	2021 ²	20223
At January 1	-	25,000	36,315
Free allocation	494,319	467,218	466,467
Cancelled allocation	-	(805)	-
Disposal	(10,000)	(18,110)	(5,000)
Purchase	4,350	-	-
Carried from	(425)	-	-
Surrendered to the government ¹	(463,244)	(436,988)	(462,978)
Carry forward	25,000	36,315	34,804
At December 31	25,000	36,315	34,804

¹ The quantity of surrendered to the government for the year ended December 31, 2021 is actual and settled, and for 2022 is an estimation.

² The quantity of surrendered to the government for the year ended December 31, 2021 was 436,988 tCO2eq in May 2022. And the residual amount compared to the allocated amount of emissions was carried over 2022.

³ Considering that the quantity of surrendered to the government for 2022 is the same as 2021, it is expected that the allocation will not be exceeded.

23. Other Financial Liabilities

35. Other Non-operating Expenses

Details of other non-operating expenses for the years ended December 31, 2022 and 2021, are as follows:

(In thousands of Korean won)		2022		2021
Donation	₩	2,632,913	₩	5,032,531
Losses on foreign currency transaction		151,791,162		108,083,187
Losses on foreign currency translation		84,748,902		28,198,854
Losses on disposal of trade receivables		1,249		1,694
Losses on disposal of investment properties		143,913		-
Losses on impairment of investment properties		-		332,432
Losses on disposal of property, plant and equipment		3,410,804		4,915,851
Losses on impairment of property, plant and equipment		7,674,457		14,492,324
Losses on abandonment of of property, plant and equipment		15,373		4
Losses on disposal of intangible assets		138,411		157,162
Losses on valuation of derivatives		1,436,107		38,367
Losses on transaction of derivatives		36,089,443		1,049,912
Losses on disposal of right-of-use assets		2,315,104		4,248,412
Other impairment loss		784,295		361,977
Miscellaneous losses		16,094,504		3,634,743
Others		6,903,989		4,295,522
Total	₩	314,180,626	₩	174,842,972

36. Tax Expense and Deferred Tax

(a) Income tax expenses for the years ended December 31, 2022 and 2021 are as follows:

(In thousands of Korean won)		2022		2021
Current tax: Current tax on profits for the year	₩	207,998,235	₩	102,329,068
Deferred tax:				
Changes in temporary differences		(32,647,471)		13,153,593
Changes in tax credit		(22,771,464)		2,656,445
Income tax expenses	₩	152,579,300	₩	118,139,106

(b) The tax on the Group's profit before tax differs from the theoretical amount that would arise using the weighted average tax rate applicable to profits of the Group as follows:

(In thousands of Korean won)		2022		2021	
Profit before income tax expense	₩	858,353,826	₩	712,853,106	
Tax calculated at statutory tax rates of each country applicable to profits		168,044,917		147,181,993	
Tax effects of:	'				
Income not subject to tax		(18,032,029)		(12,850,842)	
Expenses not deductible for tax purposes		5,741,437		4,836,481	
Effect of tax credit and tax reduction		(17,820,333)		(12,928,572)	
Additional payment (refunds) of income taxes		(4,348,498)		(11,556,374)	
Others		18,993,807		3,456,419	
Adjustments		(15,465,616)		(29,042,888)	
Income tax expense	₩	152,579,300		118,139,105	
Effective tax rate		17.80%		16.57%	

(c) The tax effect relating to components of other comprehensive income (expenses) for the years ended December 31, 2022 and 2021, is as follows:

(In thousands of Korean won)				2022						2021			
	Before tax		Tax effect		After tax		Before tax		Tax effect			After tax	
Remeasurements of net defined benefit liabilities Remeasurements of net defined	₩	79,710,319	₩	(18,485,179)	₩	61,225,140	₩	5,679,783	₩	(1,631,676)	₩	4,048,107	
benefit liabilities of associates		8,801,290		(2,150,104)		6,651,186		1,662,652		(402,362)		1,260,290	
Gains (losses) on valuation of financial assets at fair value through other comprehensive income		(5,169,866)		1,262,968		(3,906,898)		16,490,505		(3,490,583)		12,999,922	
Cash flow hedges Gains (losses)		(6,468,413)		1,547,856		(4,920,557)		(749,062)		260,527		(488,535)	
Exchange differences on translation foreign operations Share of other comprehensive		(53,611,624)		-		(53,611,624)		238,889,690		-		238,889,690

39. Earning per Share

The basic and diluted earnings per share for the years ended December 31, 2022 and 2021, are computed as follows:

(In Korean won)		2022		2021
Profit for the year Weighted-average number of ordinary	₩	690,248,871,529	₩	588,191,994,161
shares outstanding (in shares) ¹		121,988,753		121,988,753
Basic and diluted earnings per share ²	₩	5,658	₩	4,822

¹Weighted average number of ordinary shares outstanding is calculated considering outstanding ordinary shares divided by outstanding period, excluding number of treasury shares.

40. Operating Segment Information

(a) The Group has a single operating segment subject to Korean IFRS 1108 Segment Reporting; therefore, no operating segment information is disclosed.

(b) Information by region

The Group is mainly operating in five geographical regions. Net sales information by geographical region for the years ended December 31, 2022 and 2021, are as follows:

(In thousands of Korean won)		202	22		2021			
		Amount	Ratio		Amount	Ratio		
North America	₩	2,458,244,599	29.29%	₩	2,034,053,179	28.48%		
South and Central America		360,099,197	4.29%		277,060,669	3.88%		
Asia, except Korea		1,334,350,230	15.90%		1,314,786,942	18.41%		
Europe		3,281,847,319	39.10%		2,626,580,386	36.78%		
Korea		959,661,692	11.42%		888,655,652	12.44%		
Total	W	8,394,203,037	100.00%	₩	7,141,136,828	100.00%		

- (c) There is no external customer, who contributes more than 10% of the Group's total revenue for the years ended December 31, 2022 and 2021.
- (d) At the end of the reporting period, non-current assets broken by location of the assets are shown as follows:

(In thousands of Korean won)		20221	2021 ¹		
North America	₩	530,562,061	₩	519,499,532	
South and Central America		1,327,764		1,926,252	
Asia, except Korea		1,143,030,131		1,275,442,627	
Europe		566,718,301		582,873,228	
Korea		1,846,136,885		1,920,279,427	
Total	₩	4,087,775,142	₩	4,300,021,066	

¹Finacial assets, deferred tax assets and investment in associates are excluded from non-current assets.

²Basic and diluted earnings per share are the same because there is no potentially dilutive ordinary share issued by the Group.

41. Contingencies and Commitments

(a) Pledged assets as collaterals

As of December 31, 2022, a certain portion of the Group's land, buildings, machinery and equipment and financial instruments is pledged as collaterals for borrowings as follows:

(In thousands of Korean won, RUB, EUR and USD)	Pledged assets	Pledged amounts		
The Korea Development Bank and others	land, buildings	KRW	13,880,000	
		RUB	60,000	
CitiBank	Financial instruments	EUR	83,864	
ING Bank	Financial instruments	USD	80,000	

(b) Buildings, inventories, machinery and others are insured against a general liability insurance policy.

The Group is insured against potential future claims that may occur under the Product Liability Act in the Republic of Korea that was effective since July 1, 2002, which penalizes a manufacturer or seller when a product is defective and causes injury or damage to a person or property. The Group recognizes the best estimate amounting to \(\psi 3,906,548\) thousand, which is expected to be paid, as provision for product liabilities (Note 22).

- (c) For the purpose of providing tires, in India, the Group provided a payment guarantee to Bureau of Indian Standards through Shinhan Bank New Delhi branch for up to USD 70,000. Also, for the purpose of providing tires to UN Corp., the Group provided a payment guarantee to UN Corp. through Shinhan Bank GS Tower branch for up to USD 57,969.
- (d) The Group receives grants from the Hungarian government and provides Direct Suretyship as follows:

	Agreement				
Guarantee provided	HUF 9,214,435,200 + interest incurred				
The term of guarantee	From February 27, 2014,				
The term of guarantee	to September 30, 2023				
Summary of agreements	To certify that the Group should sincerely carry out the investment plan according to the investment contract; otherwise, the Group should return some or whole amount of the subsidy provided by the Hungarian government.				

(e) Transfer of trade receivables

Trade receivables with recourse that are transferred to financial institutions, but not matured, at the end of the reporting period, are as follows:

(In thousands of Korean won)		2022	2021		
Collateralized borrowing of trade receivable	₩	174,303,545	₩	251,633,253	

The Group recognized trade receivables with recourse which were transferred to financial institutions, but not yet matured as short-term borrowings (Note 20).

(f) Purchase agreement

At the end of the reporting period, The Group has purchase agreements on raw rubber materials with several suppliers, including Southland, which are usually renewed annually. In addition, the Group has supply contracts with Hankook & Group Co., Ltd., one of its related parties, to be provided trademark license and supporting work and to provide administrative work including finance, accounting, and legal affairs. Moreover, at the end of the reporting period, the Group has a long-term contract with Hankook Networks Co., Ltd., one of its related parties, to be provided with maintenance service for the Group's information system.

(g) Financing arrangements

Details of the Group's financing arrangements at the end of the reporting period, are as follows:

(In thousands of Korean won)			2022	2021		
Credit line agreements such as	Used	₩	1,002,088,594	₩	840,202,198	
collateralized borrowing	Unused		2,911,554,677		3,090,887,128	
Total		₩	3,913,643,271	₩	3,931,089,326	

- (h) Seoul Guarantee Insurance Co., Ltd has provided guarantee amount to \(\psi_3,077,331\) thousand (2021: \(\psi_15,034,074\) thousand) for Performance guarantee and others.
- (i) The Group enters into cash pooling contract between the consolidated subsidiaries. According to this contract, a subsidiary, which needs funds, can finance within the balance of the deposit without restriction.

(j) Pending litigations

The Group has been litigated from an employee (or retiree) for additional wages such as weekly holiday pay, and is in the process of appealing in the second instance due to the Group has lost in the first instance as of December 31, 2022. In this regard, the total amount of principal owed by the Group according to the amount of judgment of the lower court is \(\pmu1,478,683\) thousand recognized as provisions, and the amount of final debt attributable to the outcome of the lawsuit may differ from the amount estimated by the Group (Note 22).

The Group has been litigated due to alleging the QR code laser-engraved tires infringed the German utility model DE 20 2017 103 420 U1 (right holder: 4JET Technologies GmbH), and the Group recognized EUR 250,000 as provisions in accordance with the judgment of the District Court of the District Court of Dusseldorf, Germany on December 6, 2022. The Group filed an appeal on January 5, 2023 and is currently appealing to the High Court in Dusseldorf, Germany (Note 22).

The Group has filed a complaint with the International Chamber of Commerce (ICC) about the termination of the contract and damages related to motorsport competitions (a total of EUR 11,586,143 and claims for the fulfillment of obligations).

In addition to the above, there are a number of pending litigations as of December 31, 2022. The final outcome and impact of the lawsuit cannot be reasonably predicted and the Group's management does not believe that it will materially affect the Group's financial condition.

(k) Co-investment agreement of shares acquisition

The Group acquired 104,031,000 shares of Hanon Systems Co., Ltd. (19.49% of ownership) from VIHI LLC, which is the largest shareholder.

1) Details of Shares Purchase Agreement

- Seller: Visteon Corp. and VIHI LLC
- Purchaser: Hahn & Co. Auto Holdings LLC and Hankook Tire & Technology Co., Ltd. (formerly, Hankook Tire Co., Ltd.)
- Contract date: 2014.12.17
- Closing date of deal: 2015.06.10
- Number of shares purchased per purchaser
 - (i) Hahn & Co. Auto Holdings LLC: 269,569,000 shares (50.50% of ownership)
 - (ii) Hankook Tire & Technology Co., Ltd. (formerly, Hankook Tire Co., Ltd.): 104,031,000 shares (19.49% of ownership)

2) Contract between shareholders

The purchasers above, the Group and Hahn & Co. Auto Holdings LLC entered into a contract between shareholders that includes the followings:

- Hahn & Co. Auto Holdings LLC's drag-along right
- Group's right of first refusal
- Group's tag-along right

(I) Agreements related to shares acquisition

The Group purchased 2,059,539 shares (22.86%) of Preciseley Microtechnology Corporation from Tiansheng Zhou Family Trust, ACE Optical Ltd., and BDC Capital Inc. In connection with purchasing, the Group has entered into a shareholder agreement with the Tiansheng Zhou Family Trust, ACE Optical Ltd. and BDC Capital Inc. The Group recognized derivative financial liabilities measured as a fair value of the granted put option amounting to \(\psi\) 988,464,000.

1) Details of Shares of Purchase Agreement

- Seller: Tiansheng Zhou Family Trust, ACE Optical Ltd., BDC Capital Inc.
- Purchaser: Hahn & Co. Auto Holdings LLC and Hankook Tire & Technology Co., Ltd. (formerly, Hankook Tire Co., Ltd.)
- Contract date: 2022.02.18

2) Contract between shareholders

Туре	Name of related parties
Put option ¹	The seller has a put option to sell all or part of the shares held by the seller to the party if the IPO is not made within the agreed period of the two companies.
Tag-along right	If a shareholder transfers his shares to a third party, the other shareholders also have the right to sell their shares under the same conditions and at the same share ratio.
ROFR(Right of first refusal) ²	Hankook Tire & Technology Co., Ltd. has the right to purchase preferentially if the seller or buyer sells the shares to a third party.

¹ The parties to the put option are Hankook Tire & Technology Co., Ltd. and Hankook & Company Co., Ltd. or Preciseley Microtechnology Corporation, and seller can designate among Hankook Tire & Technology Co., Ltd. and Hankook & Company Co., Ltd.

42. Related Party Transactions

¹On April 1, 2021, Hankook & Group Co., Ltd. merged with Hankook Atlas BX Co., Ltd., and the transaction amount of Hankook Atlas BX Co., Ltd for the years ended December 31, 2022 and 2021 is included in the amount of Hankook & Group Co., Ltd.

Compensations for key management personnel for the years ended December 31, 2022 and 2021, are as follows:

(In thousands of Korean won)		2022	2021			
Salaries	₩	14,945,028	₩	15,007,350		
Post-employment benefits		2,415,454		2,389,926		
Long-term employee benefits		16,463		1,778,126		
Total	₩	17,376,945	₩	19,175,402		

43. Credit Risk

The Group is exposed to credit risk when the following payments are not made from the counterparty by the payment date.

- Payment of trade receivables within the payment terms by customer
- Contractual flows of debt instruments measured at amortized cost
- Contractual flows of debt instruments measured at fair value through other comprehensive income

(a) Trade receivables

The Group applies the simplified approach to measuring expected credit losses which uses a lifetime expected loss allowance for all trade receivables. To measure the expected credit losses, trade receivables have been grouped based on shared credit risk characteristics and the days past due.

(b) Other financial assets measured at amortized cost

All of the other financial assets at amortized costs are considered to have low credit risk, and the loss allowance recognized for the year ended December 31, 2022 was, therefore, limited to 12 months expected loss. Management considers 'low credit risk' for government bonds. Other instruments are considered to be low credit risk when they have a low risk of default and the issuer has a strong capacity to meet its contractual cash flow obligations in the near term.

44. Events After the Reporting Period

On March 12, 2023, a fire broke out in the curing process of the Group's Daejeon plant, causing damage to some buildings, machinery, and inventory assets in the plant. Manufacturing at the plant has been completely suspended for safety reasons since March 13, 2023, and the Group is confirming the amount of damaged caused by the fire and considering about dealing with the damage through a property comprehensive insurance.

45. Financial adjustments shown in comparison

In January 2022, the Group recognized an impairment loss of $\mbox{\ensuremath{\mbox{\$}}}\xspace 2,633,318$ thousand on property, plant and equipment. However, in accordance with KIFRS 1010 "Events After Reporting Period", when the Group was aware the information indicating that impairment losses on assets have already occurred at the end of the reporting period, it is a case an entity should adjust its financial statements to reflecting events after the reporting period, so the impairment loss on property, plant and equipment was the case an entity should adjust its financial statements for events after the reporting period. Therefore, the Group has restated the error to reflect it in its 2021 consolidated financial statements.
